If macOS shows a security warning, go to System Settings → Privacy & Security and allow the application to open.	9

MSIX Installer

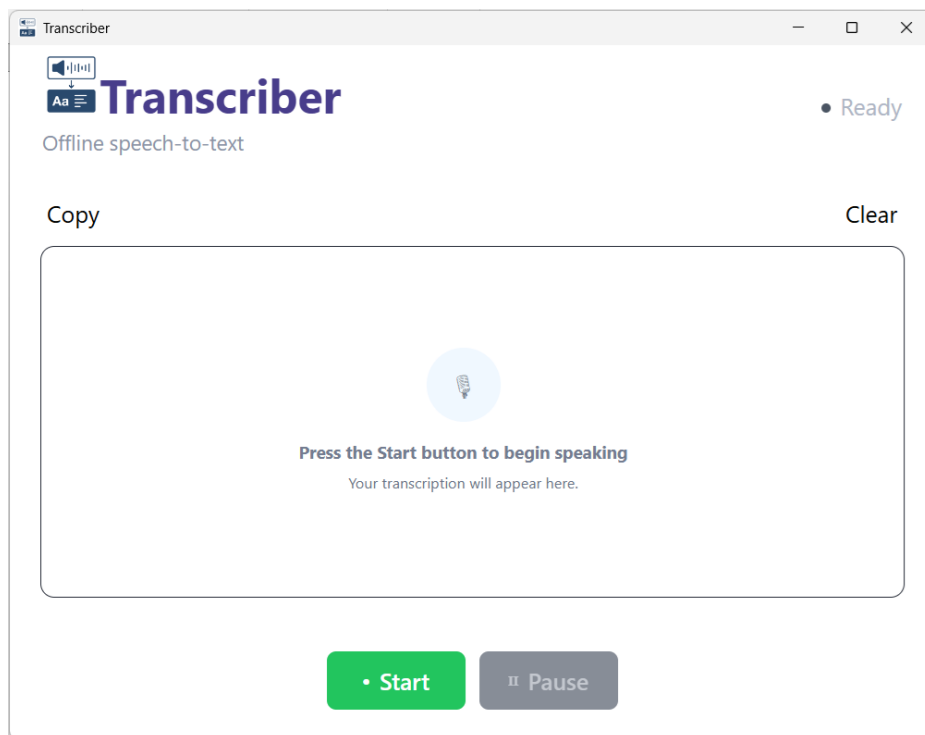

Download the MSIX installer from site (or available directly at Microsoft Store).

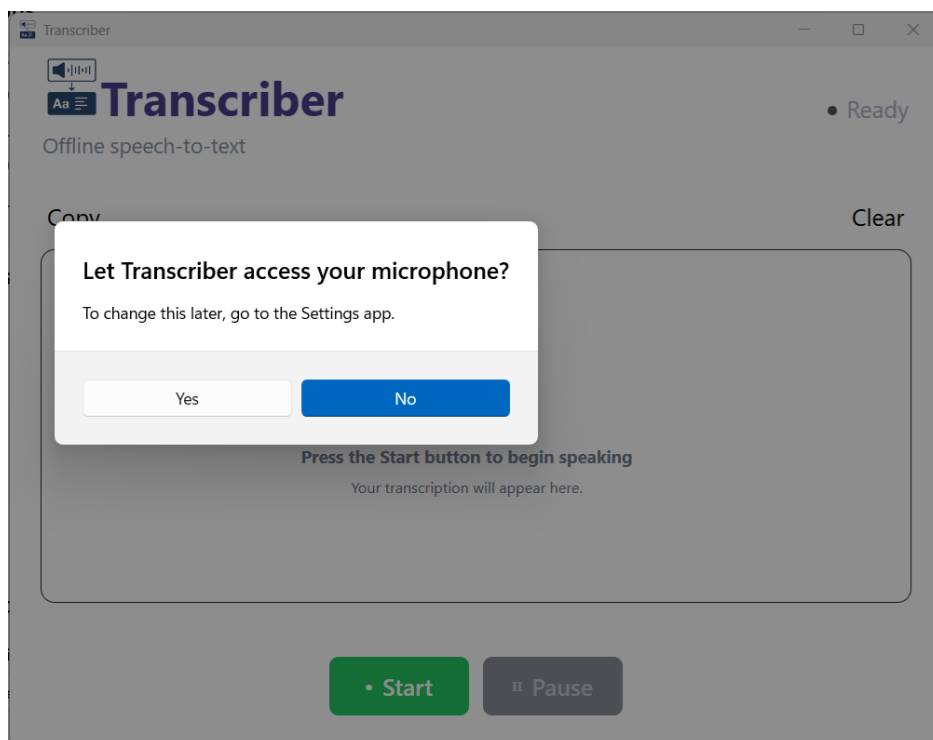

Run it to install the Transcriber, with 'Launch when ready' checked by default.

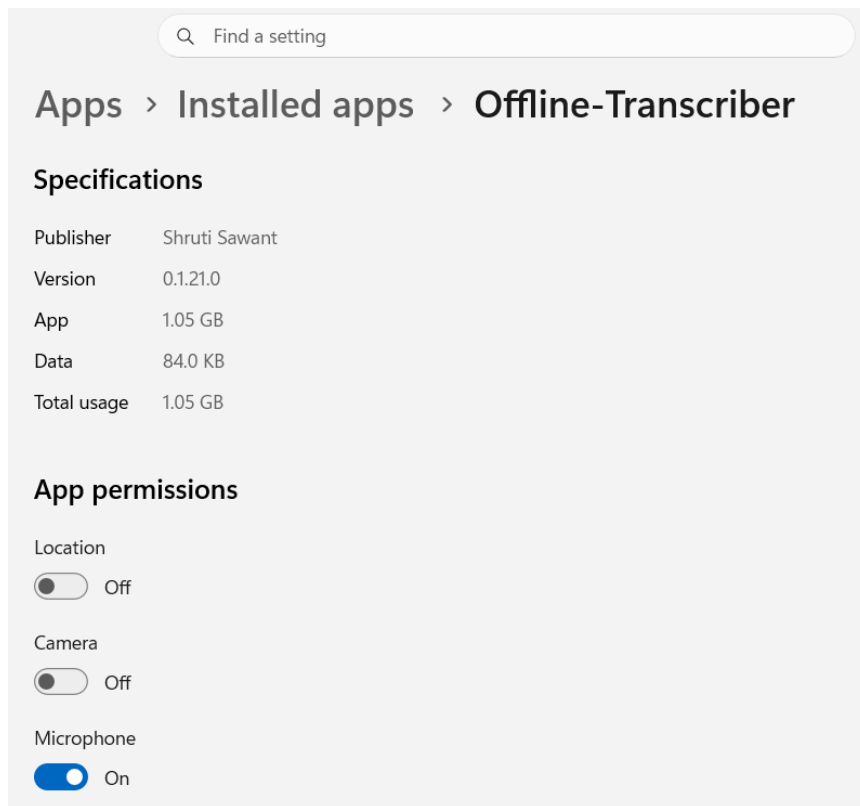

Once the **installation is completed**, the ‘Transcriber’ will open.

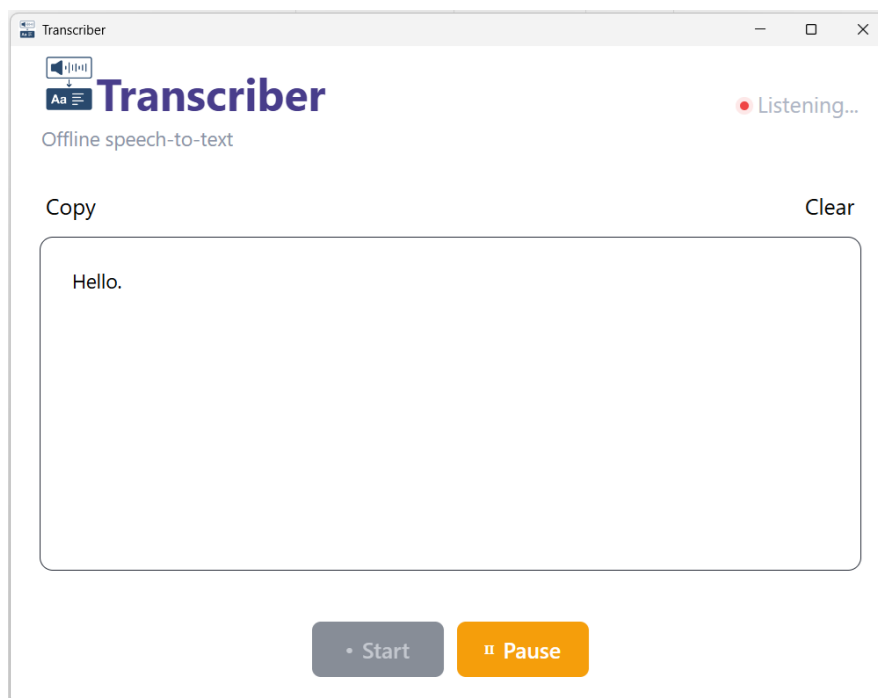

Click the ‘Start’ button. A pop-up will appear requesting access to the ‘**Microphone**’ settings. Select ‘Yes’ to proceed.

If you selected ‘No’ and need to change the settings, go to Settings > Apps > Installed apps > Search for ‘Transcriber’ > **Turn on** the ‘**Microphone**’ setting.

You have successfully installed ‘Transcriber’ and can now start using the application.

EXE Installer

Download the EXE installer.

 Transcriber-Windows-x86.7z

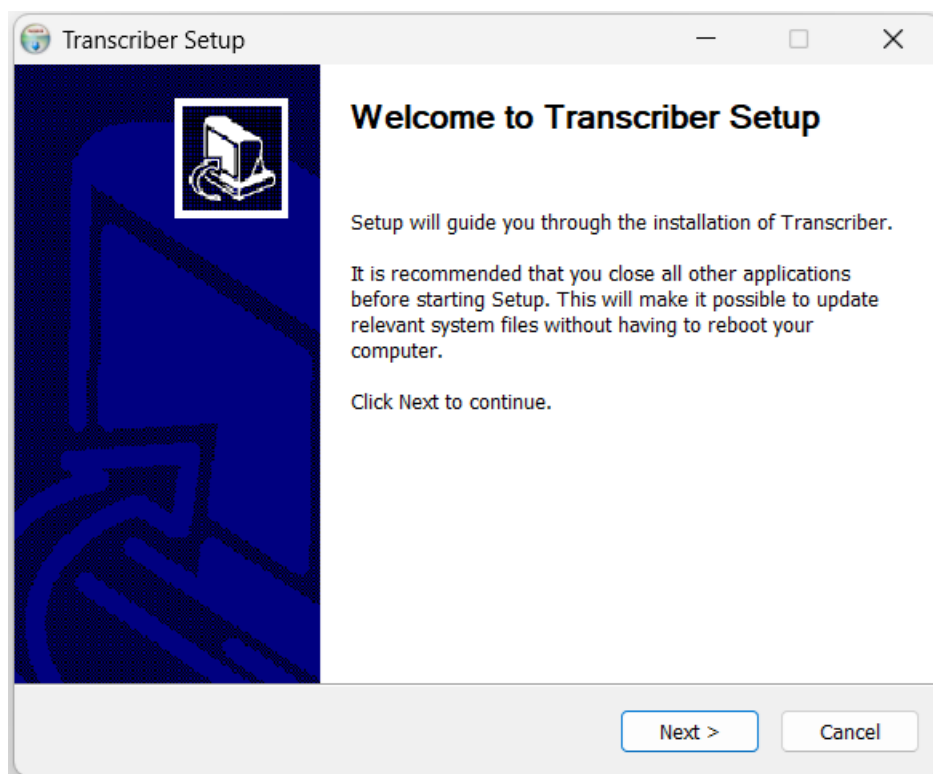

Extract the 7z file.

 Transcriber_0.1.0_x86-setup.exe

 README.html

 SHA256.txt

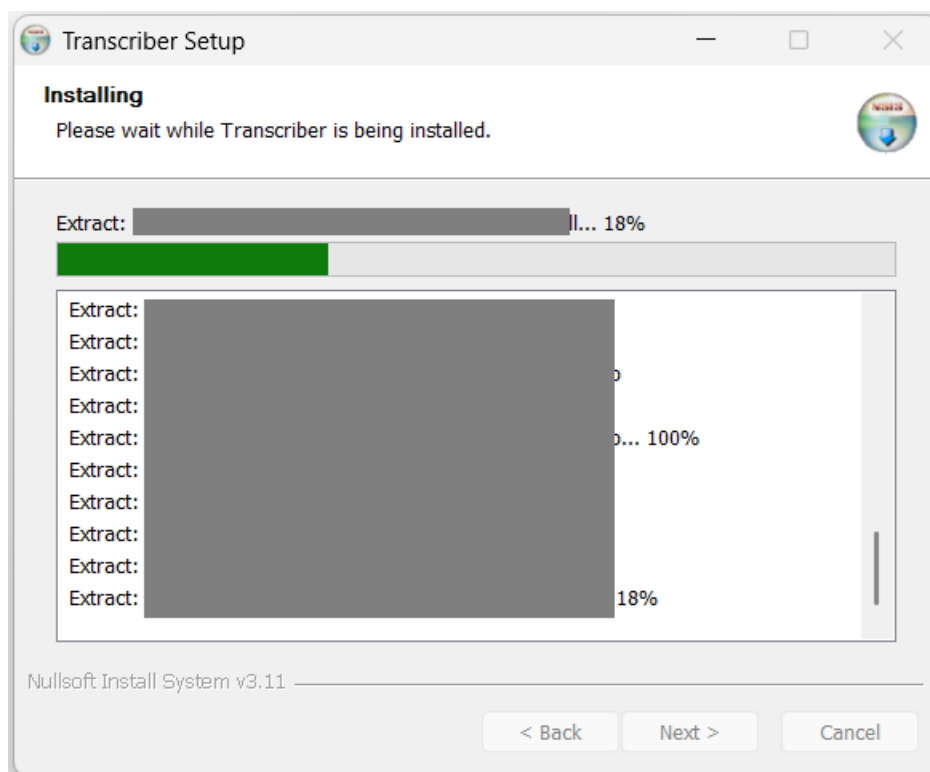

Run the EXE setup to install the Transcriber.

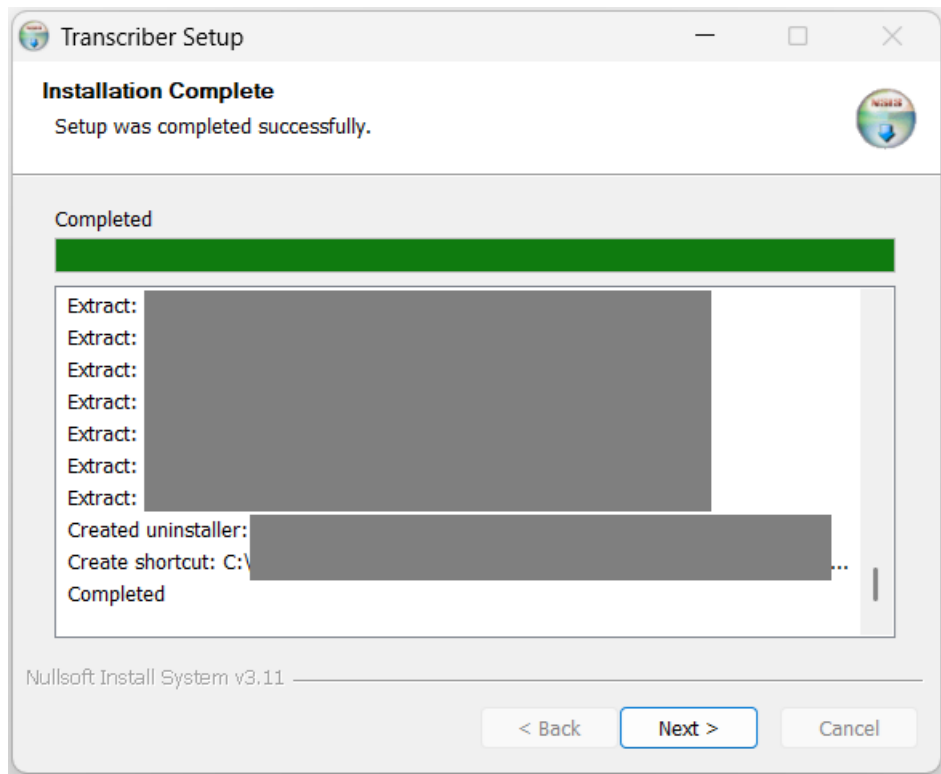

Choose the destination folder.

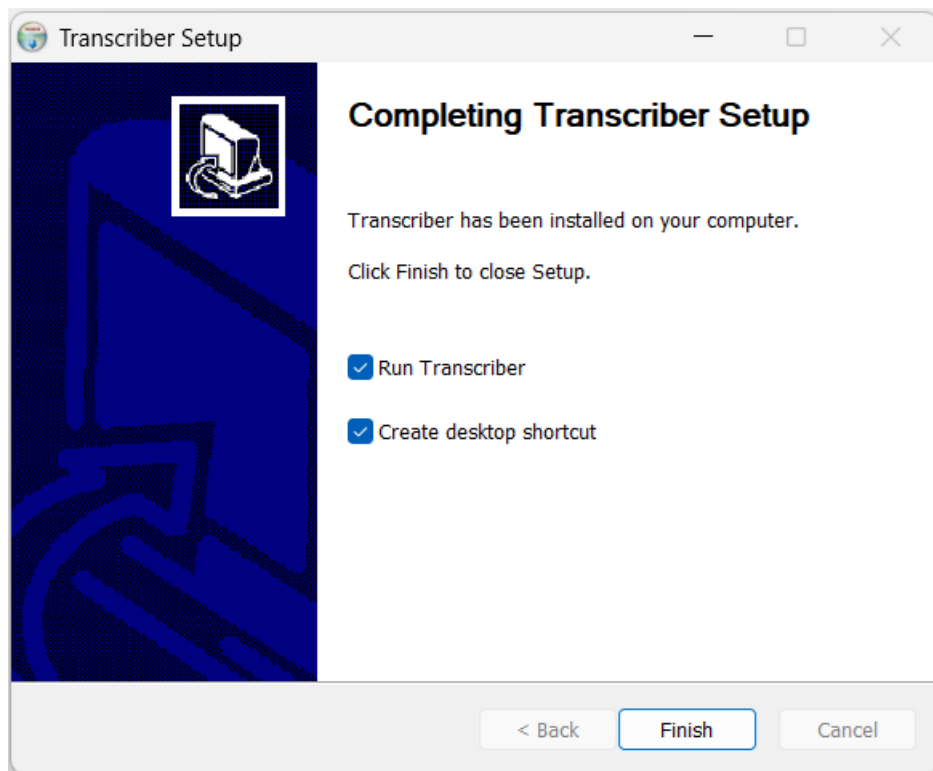

Click on '**Next**' for the installation to begin.

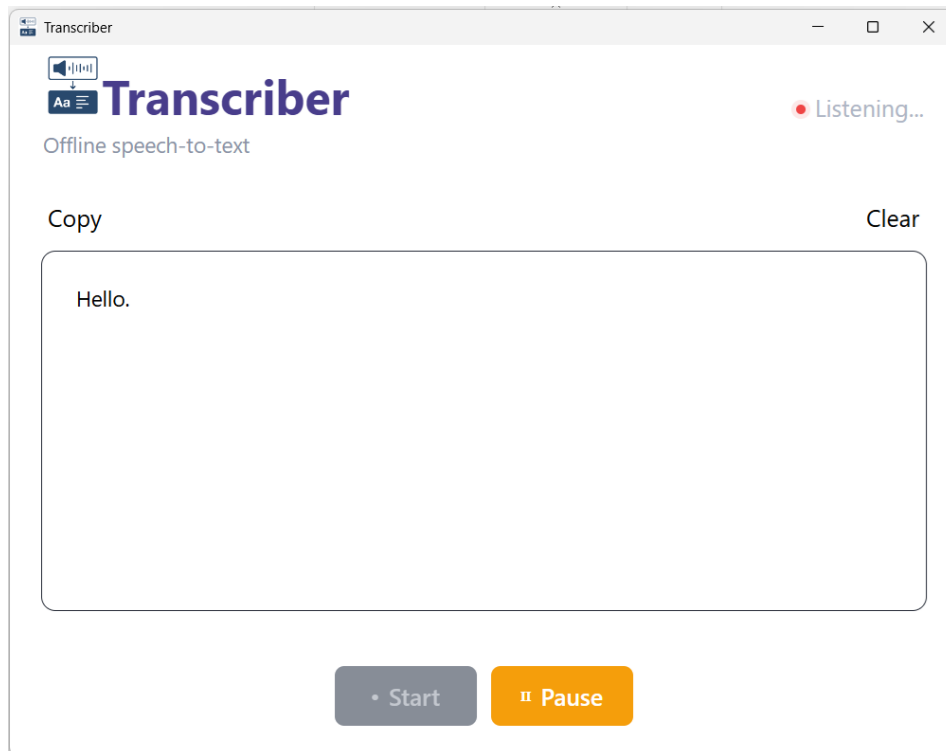

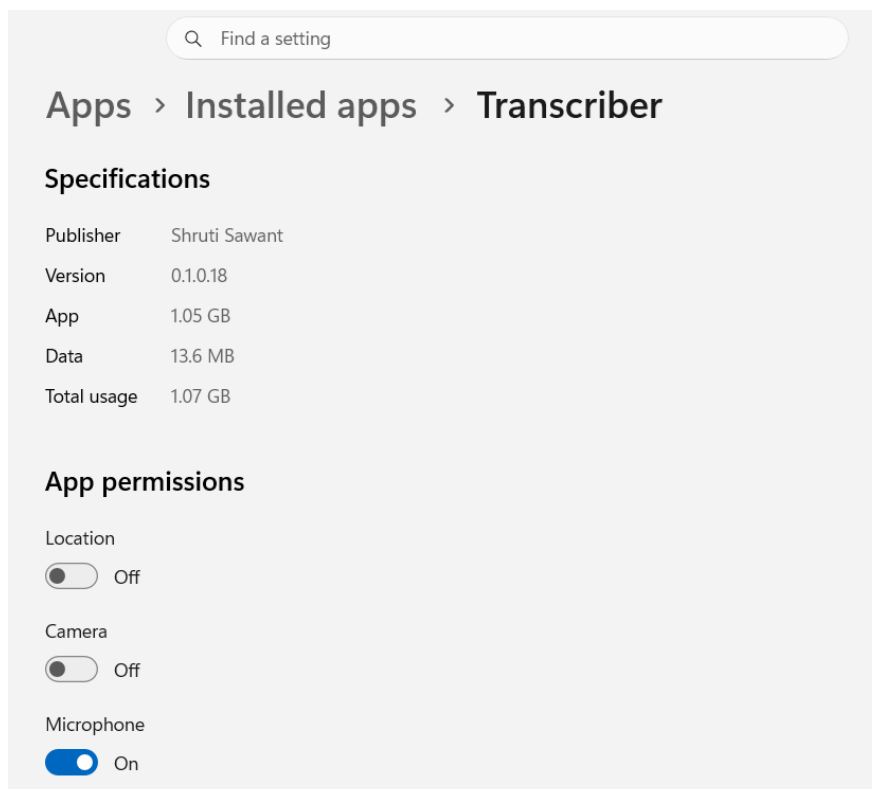

Once the installation is been completed, click on **'Finish'** with the default checks.

The **Transcriber** will be launched and you can start using it by clicking on 'Start' button.

If your '**Microphone**' settings need to be turned **on**, go to Settings > Apps > Installed apps > Search for 'Transcriber' > Turn on the 'Microphone' setting.

DMG Installer

Download the file

 Transcriber-macOS-Intel.7z

Extract the 7z file

 README.html

 SHA256.txt

 Transcriber_0.1.0_x64.dmg

Open the downloaded .dmg file.

In the window that appears, **drag Transcriber into the Applications folder.**

Open **Applications** and launch **Transcriber**.

If macOS shows a security warning, go to **System Settings → Privacy & Security** and allow the application to open.
